

Audit Services

Client Service

Our clients look to us for sound business advice and support. An audit is our tool for identifying ideas to help improve decision making, reduce waste, tighten controls, improve efficiencies and spot trouble before it occurs.

A thorough audit also acts as a communication tool, providing clear, consistent and credible information to banks and other potential investors. The more open and organized you are, the better your chances are for obtaining and retaining financing. We have excellent relationships with local lenders and attorneys to further assist you with your long term business planning.

At Freed Maxick & Battaglia, we meet with our clients on a consistent basis throughout the year. We provide objective counsel for management and serve as advisors, addressing problems and opportunities and advising on ways to respond.

Quality & Integrity

Freed Maxick & Battaglia has developed broad industry knowledge through years of experience serving entrepreneurs and closely held businesses. Our clients represent most sectors of the economy and our audit teams have developed the industry knowledge and experience to support their business needs. In addition, we are subject to a rigorous peer review every three years to ensure the quality of our work is in accordance with our professional standards. Our most recent peer review was an unqualified opinion with no letter of comments, a rating that less than 15% of all firms obtain.

Cost Effectiveness

An audit shouldn't interfere with business operations. Thorough planning and proper staffing are imperative to delivering timely results and avoiding costly delays. We further promote efficiency and cost effectiveness in our audit process through the use of the latest technology.

Work with us and we know that you will see noticeable results. We don't view an audit as a document, we view it as actionable financial information. Information that we use to help your business achieve its goals now and in the future.
